

SOHEIL SALMANI

MATHEMATICS & APPLICATIONS UNDERGRADUATE | MATHEMATICAL & COMPUTATIONAL SCIENCES

Tehran, Iran · +98 919 754 7949 · soheilsalmanisafarpour@gmail.com · LinkedIn · GitHub · Portfolio

ACADEMIC PROFILE

Mathematics and Applications undergraduate at **Kharazmi University**, with interests in scientific computing, numerical methods, probability and statistics, algorithms, modeling and optimization. Professional Python, data and technical implementation provides practical depth.

EDUCATION

Kharazmi University

Oct 2024 – Present

B.Sc. in Mathematics and Applications · GPA: ~18/20 · Undergraduate

Selected completed coursework: Data Structures & Algorithms; Advanced Programming; Probability & Statistics; Linear Algebra; Mathematical Analysis; Numerical Analysis; Differential Equations; Mathematical Software

ACADEMIC DIRECTION & INTERESTS

Scientific Computing · Numerical Methods · Mathematical Modeling · Optimization · Probability & Statistical Methods · Algorithms · Data-Intensive Computational Systems

TEACHING & ACADEMIC ENGAGEMENT

Kharazmi University

Jan 2026 – Present

Teaching Assistant · Programming with R; Mathematical Software; Probability I; Statistical Methods

Mathematics Scientific Association

May 2025 – Present

Council Member / Core Committee · Kharazmi University · One of seven elected council members

SELECTED TECHNICAL EXPERIENCE

Fara-Ro

Dec 2024 – Present

DevOps Engineer · Sep 2026 – Present · Analytics Engineer · Apr 2026 – Sep 2026

Data Engineer · Dec 2024 – Apr 2026

- Linux/Docker environments, GitHub Actions CI/CD, automated testing and secure deployment practices; financial analytics and internal R&D-oriented systems using Python, FastAPI and PostgreSQL.
- Built and maintained Python/SQL pipelines for financial-market data, including acquisition, cleaning, normalization, ETL and PostgreSQL warehousing.

Asansafar Iranian

Jun 2023 – Aug 2025

Technical Manager · Aug 2023 – Aug 2025 · Python Developer · Jun 2023 – Aug 2023

- Python backend development and refactoring, followed by technical coordination across backend, frontend and mobile.

TECHNICAL & COMPUTATIONAL TOOLKIT

Mathematical / computational: Numerical Analysis, Probability & Statistics, Linear Algebra, Algorithms, Mathematical Modeling, LaTeX

Programming / data: Python, R, MATLAB, SQL, Pandas, NumPy, PostgreSQL, FastAPI

Systems / engineering: Linux, Docker, Git, GitHub Actions, CI/CD
