

SOHEIL SALMANI

DEVOPS ENGINEER | INFRASTRUCTURE, BACKEND & DATA SYSTEMS

Tehran, Iran | +98 919 754 7949 | soheilsalmanisafarpour@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

DevOps Engineer working with Linux, Docker, CI/CD and application-security practices after earlier Python, backend and financial-data engineering roles. Mathematics undergraduate with a computational foundation in algorithms, numerical methods and statistics.

PROFESSIONAL EXPERIENCE

Fara-Ro Dec 2024 – Present

DevOps Engineer · Sep 2026 – Present | Previously: Analytics Engineer (Apr – Sep 2026) · Data Engineer (Dec 2024 – Apr 2026)

- Maintain Linux- and Docker-based development and deployment environments; configure GitHub Actions CI/CD workflows for automated testing and reliable releases.
- Apply DevSecOps practices to Python/FastAPI-based systems, including application-security considerations, server hardening and secure deployment workflows.
- Built and maintained Python/SQL pipelines for financial-market data, covering acquisition, cleaning, normalization, ETL and PostgreSQL warehousing; later supported internal financial-analytics and R&D workflows.

Asansafar Iranian Jun 2023 – Aug 2025

Technical Manager · Aug 2023 – Aug 2025 | Python Developer · Jun 2023 – Aug 2023

- Helped build and coordinate technical work across backend, frontend and mobile; supported task planning, architecture discussions and MVP delivery.
- Developed and refactored Python backend and core product logic, with emphasis on maintainability.

EDUCATION

Kharazmi University Oct 2024 – Present

B.Sc. in Mathematics and Applications

Selected coursework: Data Structures & Algorithms, Advanced Programming, Probability & Statistics, Numerical Analysis

Teaching Assistant: Programming with R, Mathematical Software, Probability I and Statistical Methods · Jan 2026 – Present

TECHNICAL SKILLS

DevOps & systems: Linux, Docker, Git, GitHub Actions, CI/CD, Bash, DevSecOps, Application Security, Server Hardening, Automated Testing

Backend & data: Python, FastAPI, REST APIs, SQLAlchemy, PostgreSQL, SQL, Data Pipelines, ETL, Prefect, Pandas, NumPy

Computational: R, MATLAB, LaTeX; Algorithms, Numerical Analysis, Probability & Statistics
